

JC POMERLEAU

TECHNOLOGY GURU

Go BEST's own version of IT special forces, JC Pomerleau is dedicated to ensuring business owners and operators sleep soundly. JC fell into the field of internet technology during its early days by assisting a nightclub chain with computerizing its operation, beginning with POS, CCTV, ATMs, networking and ultimately cybersecurity. Now he stands at the forefront of the ever-evolving IT landscape, embracing challenges and finding innovative, speedy resolutions. Venturing far beyond simple installations, JC has developed our proprietary Go BEST Practices guide, shaped by his twenty-five-plus years in the field, as well as our FREE Go BEST Practices evaluation, conceived for clients of all sizes, on any type of budget. JC splits his time between Las Vegas and San Diego; when he's not working, he can be found hiking with his family or mountain biking through the rugged terrain of the Rockies.
